**NEW! THE WONDER
FLORIBUNDA ROSE!**

Spartan

(Left) Never before a Rose like this! For sheer beauty, breathtaking color, exquisite form, profusion of bloom, exceptional hardiness—for a combination of all the qualities looked for in any type of Rose—Spartan simply can't be beat! What a truly amazing creation this is! The hardest, finest Floribunda ever created that bursts into bloom month after month all season long—that produces whole bouquets of longer stemmed, Hybrid-Tea-shaped, fragrant Roses—that grow anywhere without special care—that is hardy and disease-resistant beyond compare. It's truly the first perfect 20th Century Rose ever developed—and it will be the center of attraction in your garden for years to come!

HUGE ORANGE-RED BLOOMS

The unusually lovely flowers start displaying their stunning beauty early in the season . . . as scores of gorgeous burnt-orange buds begin to appear on the attractive plant! Slowly, the buds open . . . revealing large high-centered Hybrid-Tea-shaped blooms, with 35 to 40 petals each . . . starting a sparkling warm ORANGE-RED color! Think of it! Blooms that *look* like prized Hybrid Teas, as *big* as Hybrid Teas—yet produced by the hundreds on a single bush.

LONG-LASTING BEAUTY!

Colorful in bud form? Yes! Colorful in the open flower?—Yes! And the color really lasts—the blooms retaining their beauty right to the end . . . finally softening to a reddish-coral color. But the exceptional color is only part of Spartan's beauty . . . there's a sweet, old Rose fragrance, too. But that's not all! The flowers bloom on LONG, LONG STEMS! Yes, over 100 of them on a plant—which makes Spartan a perfect flower for cutting. There's no end to the flowers available for house use . . . for the healthy plant is in bloom from early spring to severe frost! Without question, Spartan is destined to become the most popular Floribunda Rose of all time! (Pl.Pat. #1357.)

Gold Medal,
Paris, France

(Below) And now the Prima Donna of Floribundas—that performs with the grace and charm of a flirting ballerina—has added another laurel to its name with the coveted Gold Medal of Bagatelle in Paris, France. Such gay, colored buds . . . a lively tawny gold color. Slowly, dramatically they open to a light shade of rich, warm gold . . . then . . . as a grand finale, they flare into a bright, dazzling canary color! The flowers are unusually large for a floribunda—actually 4 to 4½ in. across . . . growing in graceful clusters with as many as 20 individual blooms! The plant also displays unusually decorative, disease-resistant foliage in a medium shade of green. You'll be delighted to have this beauty in your garden. (Pl. Pat. Applied For.)

A New Rose in a New Color!

(Above) Here in the Amy Vanderbilt Rose is a world-wide new color in Roses. The modern sophisticated purple-lilac to lavender-lilac brings to the Rose world a rich, friendly and daring color for novelty and startling new effects. From early bud to fully opened flower, the color changes slowly from an opulent purple-lilac to a lavender-lilac color and finishes a lovely cool lavender. The 2½ to 3-in. flowers grow in clusters of from 4 to 8 individual blooms and are delightfully fragrant. This new color is a great step in advance in the Rose world and is a great challenge to the many people who love to produce color effects either in their homes or garden. Be among the first to enjoy this Rose that is as sophisticated as the nationally famous person for whom it is named. The plant is healthy and vigorous; excellent dark green foliage. Four Sensational Roses for

Queen Elizabeth *The Grandiflora Rose!*

1955
ALL-AMERICA
WINNER!

(Left) The superb and delicate pure pink shade, found only in the choicest Cattleya orchids, has at last been captured in the gorgeous new Queen Elizabeth Rose, All-America winner for 1955. A lovely new color and a new class as well, for this charming ruler of rosedom is the first of the new "Grandiflora" class, named for its abundance of flowers combined with the magnificent qualities of the Hybrid Tea. Looking at the unusually clear, glowing blooms of Queen Elizabeth, you see a subtle and breathtaking blending of soft carmine-rose and dawn-pink, majestically set off by deep green, heavy-textured, glossy foliage abundantly clothing the entire bush to the ground. Exceptional vigor and remarkable disease resistance insure healthier, more luxuriant growth all season long. Charming and tantalizingly fragrant, Queen Elizabeth flowers are as lovely and graceful as their gracious namesake, and what's more, they are borne on long, almost thornless cutting stems. Queen Elizabeth blooms grow richer and more beautiful with age and last very well when cut. (Pl. Pat. #1259.)

WORLD'S LARGEST YELLOW ROSE!

The Million-Dollar Rose!

Blooms Up to 7½ Inches Across!

(Below) The graceful, flowing lines of the long golden buds catch the eye immediately. As they mature, an occasional blush of red caresses the edges of the slender, 1½ to 2-in. buds. Throughout the season these exquisite buds unfold slowly, giving way to majestic, high-centered flowers of rich golden yellow. The summer sun, instead of fading these tremendous blooms, only intensifies their already brilliant color. Imagine a plant with constantly repeating, radiant blooms that often reach 6½ to 7½ in. across, depending on the locality. From the start, the golden bud stops the eye and the shapely, long-lasting flower keeps one watching it to the end. Even

before these magnificent flowers appear, the bush adorns itself with nearly perfect foliage. Immaculate and prim, the glossy green color makes the large leaves decorative even without the flowers. 2½ to 4 ft. Very hardy. (Pl. Pat. #1284.)

For the Garden of Your Dreams!

NEW!

PEACEFUL *Seedling of a Famous Parent!*

(Right) Jackson & Perkins takes special pride in introducing Peaceful, the new Hybrid Tea Rose whose very name is symbolic of harmony and friendliness. This delightful, full Rose reaches about 5 in. across, lending stately charm to your entire garden and everything around it. The bright cheerful color of the bud gives only a hint of the glorious latent beauty that is revealed in the color of the full-open bloom. Large, ovoid buds open slowly and when only half open the light coral outer petals that are suffused with pale apricot bend slightly, revealing the luminous deep coral-rose-pink of the inside of the petals. This bicolor effect is achieved simply and with amazing clarity. The tip of each petal reflexes slightly as it opens and the deeper shade of the inside of the petals makes a most attractive pattern against the lighter reverse. The large, fully open flower is partially cupped and supports about 50 luxurious petals, while retaining the same pleasing color only slightly less intense. Peaceful is an exceptionally strong, vigorous plant. 2½ to 3 ft. (Prop. Rights Reserved)

TWILIGHT. A lovely new pastel lavender-lilac with a light silvery reverse. One of our new series of lavender and lilac-shaded Roses, which we have been developing from the Grey Pearl and Lavender Pinocchio strains. The bud is pointed, and the flower opens gradually to show a high center. The plant reaches 20 to 24 in. (Pl. Pat. #1434.)

Konrad Adenauer

(Below) This beautiful Rose was named for the world-famous Chancellor of Germany at an immense international garden show at Hamburg and gained immediate popularity. This sleek, ravishing Hybrid Tea was a real "show-stopper." This beauty captured the eye and heart of everyone—actually stole the show from a display including the largest assortment of flowers ever exhibited. Spectators were held spellbound by the huge, pointed, dark red buds . . . lovely buds that open ever so slowly to a blood-red . . . and finally to a darker shade of red that reflects a luxurious velvety sheen! Blooms freely during the entire season . . . and the plant itself is extremely healthy and vigorous! Proud and upright, this hardy beauty grows on a strong stem and neck. The high-centered form and slow-opening characteristics . . . plus the dark red color and outstanding fragrance have actually sky-rocketed this unusual Hybrid Tea into the class of a Show Rose! If you want your Roses to be noticed and complimented, you'll insist on having Konrad Adenauer in your garden. (Pl. Pat. #1452.)

Fashion Only Rose Ever to Win
7 International Awards!

(Left) Fashion is definitely the finest Floribunda Rose ever created! As the oriental-red buds gradually open, they are transformed into exquisite miniature Hybrid Tea-shaped blooms up to 3½ in. across. At the same time a gradual color transformation occurs as the buds blend into a lighter, luminous coral suffused with gold. Graceful, wavy petals and a rich display of golden yellow stamens add new interest to the open flower. Enchantingly fragrant, Fashion blends well with all its garden neighbors. Its sparkling colors are handsome in a group planting in front of shrubs or evergreens, as a hedge leading to house or garden, around the house or simply as a colorful accent in your garden. There is no other Rose like it. The bushy plant grows about 2 ft. tall and blooms profusely all season long. (Pl. Pat. #789.)

JIMINY CRICKET

Top Winner, 1955
All-America Award!

(Left) A pert new Floribunda with masses of tangerine-red buds which open to a sharp coral-orange vermillion and finish a pink-coral, almost like Fashion. The unusual coloring is the result of a crossing of Geranium Red, which has blended and softened this red to a very lovely new coral-rose shade. Although it does not have the same Geranium Red fragrance, Jiminy Cricket has a distinctive, pleasing Damask scent. The bush is covered with glossy green foliage; young foliage is glossy bronze, attractive even without flowers. The color never blues or becomes unpleasant, and the Rose is intriguing in the garden and when cut. Upright, 4-ft. bush. (Pl. Pat. #1346.)

PEACE

(Left) Peace takes a distinguished place among yellow Roses. The ovoid buds are golden yellow, etched with pink. As

they open, they change from canary-yellow, to pale gold, to iridescent cream. Petals are edged apple-blossom-pink, which deepens as the glorious 5 to 6-in. flower slowly opens. Peace brings ethereal beauty to your garden all summer long. The petals roll gracefully outward to form a very double, cupped flower with a high-centered golden heart. The plant is as superior as the bloom—hardy, vigorous, disease-resistant. Flowers are unusually large, borne on heavy stems. (Pl. Pat. #591.)

Opera

OPERA (Left) Opera was the sensation of France in 1948 when it was awarded a Gold Medal as the most beautiful Rose in that country where beauty reigns supreme. Among other achievements are awards in this country as well as Gold Medals in London, Geneva and Bagatelle. The long slender buds of scarlet with golden yellow at the base are a delight. Magnificent 6-in. blooms cover the plant with their flaming light scarlet on the outer petals and buff-yellow on the reverse. These high-centered blooms have quilled wavy petals and are borne on long, strong stems appropriate for cutting. Gorgeous blooms are fortified by a vigorous upright bush and green leathery foliage. DETROITER (Right)

The most popular color in a Rose is Red! Detrouiter is a welcome addition to the realm of red Roses, and at the same time it honors one of America's most vital cities. Vibrant and alive with color, Detrouiter is endowed with buds of rich carmine-red with dark velvety overtones. Opening slowly, these long, elegant buds give way to spectacular bright red, high-centered blooms that reach 5½ in. across and have 20 to 25 crisp petals on each bloom. The tall bushy plant has an abundance of this pleasing dark green foliage, which adds to the eye-capturing effect. Basal shoots make Detrouiter a strong, well-balanced plant. It reaches a height of about 3½ ft. (Pl. Pat. #1219.)

Combining this lovely purity with artistic form and dependability, Rex Anderson adds a new note of interesting contrast to any Rose planting. Its very perfection of form and color simplicity are a dramatic contrast of great loveliness. Its fully double flowers may be grown to enormous size by disbudding. Exceptionally free and vigorous, with abundant gray-green foliage. Soft and fascinating scent. Another favorite we are proud to offer. SUMMER SNOW

(Left) Fabulous clusters of fluffy white bloom throughout the season, from June to late fall. Starts early in the season with a magnificent display that covers the plant with masses of 2-in. blooms . . . 12 to 15 on each cluster. Sweet, elusive fragrance. Then throughout the summer new flowers develop as fast as the old ones fade, providing a continuous display for mass planting or beds. Plants are about 20 in. tall, with light green foliage. This makes it one of the most popular Floribundas for hedges. Regardless of what you have in your garden, Summer Snow will make it more interesting. A "good neighbor" Rose, it blends with everything and never raises a discordant tone. (Pl. Pat. #416.)

The brilliant orange-scarlet color of Independence is so vivid that words or color illustrations just cannot do it justice. Borne in clusters of 6 or more, its vivid color is superbly accented by its rich glossy foliage. It grows from 2½ to 3 ft. in height, producing great quantities of foliage and forming a very compact bush. Independence does not fade or lose its color in the sun and possesses a moderate old-fashioned Tea Rose fragrance. This beautiful Rose actually produces blooms up to 4 in. across—really huge for a Floribunda. (Pl. Pat. #1036.)

LYTHRUM, HYBRID ROBERT (Right) Here is really a different new variety of the hardy Lythrums, with lower growth and cleaner color. The color is a clean, rich deep rose-pink, which comes June 5 and stays through the summer. The plant grows about 36 in. tall and will reach 2 ft. in width. Beautiful flowering spikes are up to 14 in. long, and each individual floret is ¾ in. across. An established plant will bear about a dozen spikes. This medium-height variety is very hardy and will do well in either wet or dry locations; it will also thrive in semi-shade. A good summer color spot.

From July to frost it produces a great quantity of blooms with good cutting stems. A hardy, showy plant for ordinary soil. It will grow easily and should be planted about 20 in. apart for best results.

to provide trim and sturdy stalks not easily blown down by the wind . . . yet not cumbersome and stiff in bouquets. You will find that J & P Delphiniums do not need staking in most localities.

This Northern New York strain reaches these ideals and still has kept all the exquisite grace and charm of Delphiniums at their best. Plant them in threes, fives or dozens for dramatic color effects.

GAYETY (Not illustrated) A dainty color that is most pleasing—pinkish lavender with outer petals blue. Unique color display that will remind you of "lavender and old lace." Side shoots prolong the blooms for several weeks. 5 ft. tall.

FREEDOM (Above)

White, with black-and-white bees. The long-lasting spikes are set with large, double florets and bloom again in late summer if cut back after the early crop. Will "pep up" any garden, for it has real character. This variety is in great demand because it is an excellent color to accent a perennial border. Stunning in all-white bouquets or in combination with bright colors. 4½ to 5 ft. tall. Striking in groups or with other Delphinium hybrids.

85c each; 3 for \$2.25;

DELIGHTFUL (Above)

Deep blue. The rare, real all-blue, in the darker shades so hard to get. Particularly effective because it is so good with other colors. It furnishes a glorious background for lower-growing flowers. 5 ft. tall. This is what you have in mind when you speak of dark, rich "Delphinium-blue." It is a glorious color badly needed in most perennial plantings. Be sure to cut back the plant after its first blooming period so that it will repeat later.

GLORIOUS (Right)

Deep royal purple, by far the darkest and richest of all Delphiniums. This is truly a breath-taking color. The plant repeats quickly with its colorful bloom spikes and is always perfectly hardy. A color needed for accent, no matter what other varieties are grown. 4½ ft. tall.

FAMOUS J & P VARIETIES!**

Tree Roses are the pinnacle of perfection. And now you can grow the "Queen of Flowers" in unequalled excellence. The blooms produced on Tree Roses are superior in quality to those produced on regular bush form. Modern Tree Roses are the crowning glory of the plant world . . . for giant size, exquisite form, brilliance of color, and abundant bloom from June through frost.

J & P Tree Roses Are Better Because: They are grown on special strain of Multiflora root and stem • Transplant easily, handle well for winter protection • Trunks 3¼ ft. tall; bushy, well-balanced heads • Trunks increase in diameter in proportion to the top • They are not subject to borers and other ills common in stems of previous kinds.

Please Read This: Tree Roses are very popular and take years longer to produce than bush Roses. Therefore our supply is comparatively limited. If any variety you order is sold out, rather than disappoint you we shall send another of similar color. Instructions for planting and care are supplied with every order.
